IT Infrastructure Engineer | Service Desk · Networking · Web Development

SUMMARY

IT Infrastructure Engineer with branch IT operations experience at Maybank Balikpapan, resolving 125+ service requests per month across core banking applications, LAN/network, and hardware for 100+ employees at 3 branch offices. Computer Science graduate (GPA 3.59/4.00) with web development and UI/UX experience from building the Employee Information System for PT Komatsu Remanufacturing Asia, plus 2 years as an Assistant Lecturer teaching networking, Linux, and cloud (Docker, CI/CD).

WORK EXPERIENCE

Technology Infrastructure Engineer Apr 2026 — Oct 2026
Maybank *Balikpapan, Indonesia*
- Resolved 125+ IT service requests per month across 3 branch offices for 100+ employees, with a 100% resolution rate based on ITSM ticket reports.
- Independently troubleshot core banking applications, network connectivity, and hardware issues as ticket volume grew.
- Coordinated vendors and monitored branch renovation, relocation, and LAN recabling projects across multiple sites.
- Monitored server room infrastructure (UPS, fire detection, temperature/humidity) and security systems to support continuous availability.
- Installed and configured core banking application environments, PCs, PIN pads, and multifunction devices for new and relocated workstations.

UI/UX Designer & Web Developer Intern Jan 2025 — Feb 2026
PT Komatsu Remanufacturing Asia *Balikpapan, Indonesia*
- Built the web version of the Employee Information System (EIS) with Laravel, Livewire, Blade, and Tailwind CSS, covering Attendance, Reimbursement, Time Management, and approval workflows for employees without mobile access.
- Designed mobile and web interfaces in Figma (user flows, wireframes, high-fidelity prototypes) using the Design Sprint methodology, including face-recognition attendance.
- Achieved 100% task completion in usability testing with 17 respondents; collaborated with cross-functional teams in an Agile environment.

Assistant Lecturer (Teaching Assistant) Jan 2024 — Dec 2025
Institut Teknologi Kalimantan *Balikpapan, Indonesia*
- Taught Computer Network Design & Management (IP addressing, subnetting, routing, VLAN, network security) and Operating Systems (Ubuntu/Linux), including designing and simulating network topologies in Cisco Packet Tracer.
- Guided Cloud Computing practicums on Docker containerization and CI/CD pipelines; mentored 50-60 students per class across 7 courses including web and programming.

EDUCATION

Institut Teknologi Kalimantan Balikpapan, Indonesia
Bachelor of Computer Science (S.Kom), Information Systems *Aug 2022 — Jan 2026*
- GPA: 3.59/4.00

SKILLS

- **Infrastructure & Support**: IT Service Desk (ITSM), Windows Administration, Hardware & Peripheral Troubleshooting, Core Banking Application Support, Server Room Monitoring, Vendor Coordination
- **Networking & Systems**: TCP/IP, LAN & Network Cabling Projects, Subnetting, VLAN, Routing, Network Design & Simulation, Linux (Ubuntu), Cisco Packet Tracer
- **Development & Design**: PHP, Laravel, Livewire, JavaScript, React, Express, Python, Filament, SQL, Tailwind CSS, Figma
- **Cloud & DevOps**: Docker, CI/CD, Git
- **Methodologies**: Agile/Scrum, Design Sprint
- **Languages**: Indonesian (Native), English (Conversational)

PROJECTS

Sweetle – Freelance Full-Stack Developer (project-based) Jan 2025 – Feb 2025
- Built a cake showcase platform for a small bakery using Laravel (Blade) and Filament, allowing customers to see which cakes are currently available or sold out.
